Examiner's Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:
 - 5.1 As regards independent Claims 1, 14 and 16, the following limitations, in combination with other limitations, are neither anticipated nor made obvious by the prior art.

"A simulator for verifying the functionality of an electrical product safety tester" in combination with *"an arc view window."* The prior art does not teach or suggest this combination.

Art Unit: 2123

As regards independent Claim 19 the prior art neither anticipates nor makes obvious the following combination of limitations in combination with other limitations, *"A simulator for verifying the functionality of an electrical product safety tester,"* in combination with *"wherein said air gap device is designed to arc over at about 750V."* The prior does not teach or suggest this combination. Further, the Examiner notes that the phrase, *"about 750V"* is not ambiguous or unclear as required by 35 USC § 112-second paragraph, *see MPEP section 2173.05 (b)*.

As regards independent Claims 20 and 21, the prior art neither teaches nor make obvious, the following combination of limitations, in combination with other limitations, *"A simulator for verifying the functionality of an electrical product safety tester,"* in combination with *"a first resistor/impedance element in series with said second switch, and a second resistor/impedance element in parallel with said series connection of said second switch"*. The Examiner notes that Applicants' are claiming the exact circuit configuration of Figure 5 and the Examiner further notes that this specific circuit configuration is neither anticipated, nor made obvious by the prior art, and more specifically not in combination with a simulator designed to verify the functionality of an electrical product safety tester.

5.2 Dependent claims 2-6, 8, 9, 17 and 18 are allowed as they depend upon and allowed base claim.

5.3 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,745,146 discloses an automated test system for testing a circuit's ground connections. US Patent 6,005,404 and US Patent 6,373,270 disclose a simulated environment for stress testing and electrical testing electrical appliances, (Col. 2 lines 55-57). US Patent 6,011,398 discloses a Current-Leakage Tester which discloses circuits similar to but not the same as Applicants' claimed test circuit (Figures 2A-2E).
